

Roman Coceres

Full Stack Developer

📍 Argentina ✉ romanagcoceres@gmail.com 📞 0376 416-9878 🔗 roman-coceres 🌐 CoceresRoman

Summary

Full Stack Developer with proven fintech experience specializing in Java Spring Boot, NestJS, and TypeScript (React/Angular). Expertise in microservices architecture, REST API design, and AWS cloud infrastructure. Skilled in CI/CD automation and DevOps practices with a track record of building scalable, production-ready payment systems.

Skills

Languages: TypeScript, Java, JavaScript

Frontend: Angular, React, TypeScript, HTML5, CSS3, Tailwind CSS

Backend: Java Spring Boot, NestJS, Node.js, Express, REST APIs

Cloud & DevOps: AWS (EC2, ECS, RDS), Docker, GitHub Actions, CI/CD pipelines, containerization

Databases: PostgreSQL, MySQL, MongoDB, relational and NoSQL design

Architecture: Microservices, REST APIs, system design, scalability patterns

Experience

Full Stack Developer, Helipagos (Fintech Payments) – Argentina June 2025 – present

- Architected and developed Checkout V2 frontend and middle-end services, improving payment flow performance in fintech platform
- Implemented automated CI/CD pipelines using GitHub Actions, Docker, and AWS EC2, reducing deployment time by 60%
- Managed backend microservices deployments and infrastructure scaling on AWS ECS with container orchestration
- Designed and deployed scalable REST APIs using Spring Boot and microservices architecture pattern

Full Stack Developer, Freelance – Argentina May 2023 – present

- Developed full-stack applications using React/Angular frontend with Node.js and Java backends
- Designed RESTful APIs and deployed Dockerized applications to cloud infrastructure
- Implemented database solutions with PostgreSQL and MongoDB

Petty Officer, Argentine Naval Prefecture – Argentina Jan 2022 – May 2025

- Worked in high-responsibility environments requiring discipline, teamwork, and strong communication skills

Projects

Habita – Real Estate Management Platform Jan 2024

- Full-stack property and client management system built with TypeScript, React, and PostgreSQL.
- URL: habita.weareamcode.com

CRM Demo – Customer Relationship Management System

Jan 2024

- CRM system for managing clients and sales workflows with REST APIs and relational database.
- URL: crm-demo.amcode.com.ar

Agentify – CLI Tool for AI Projects

Jan 2024

- TypeScript-based CLI tool that auto-generates configuration files with GitHub integration.
- URL: github.com/CoceresRoman/agentify

Education

Self-taught, Full Stack Development

Continuous learning in backend systems, cloud infrastructure, and microservices.
